

## PATH ADJUSTMENTS VIA DELLA LANA E DELLA SETA

Variations required due to landslides – Updates on 02/06/ 2023.

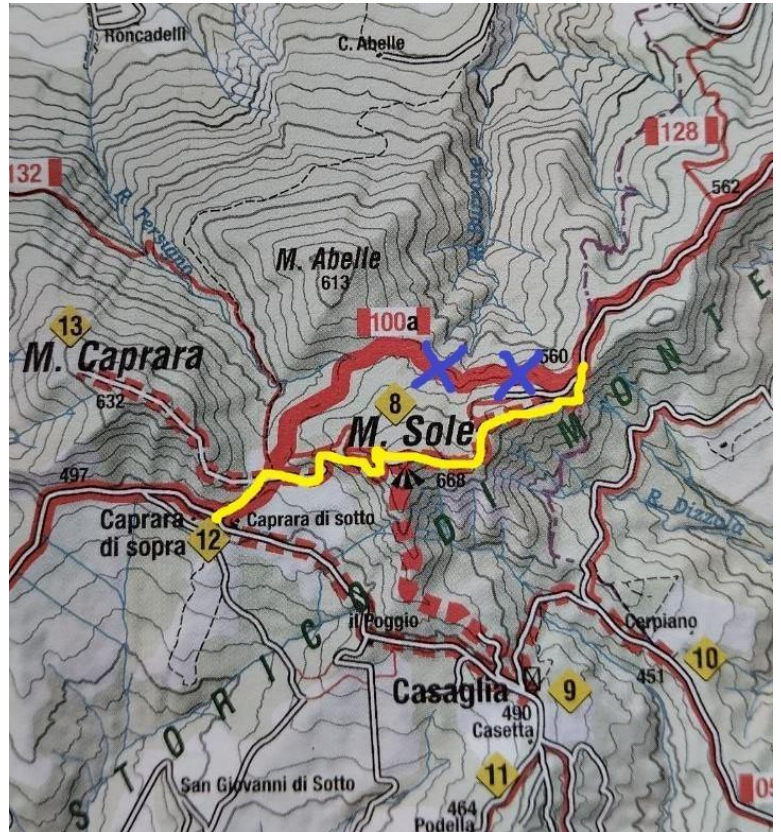

On the first stretch from Bologna to Sasso Marconi there are no big problems. We suggest bypassing the construction area of Ponte Leonardo by taking the train in Sasso Marconi and make one stop to Lama di Reno. If You prefer taking the original path, be aware that after the bridge at Piccolo Paradiso You need to go left along the trail variant that goes up to San Silvestro. The original path that reaches Monte Baco is closed due to landslides.

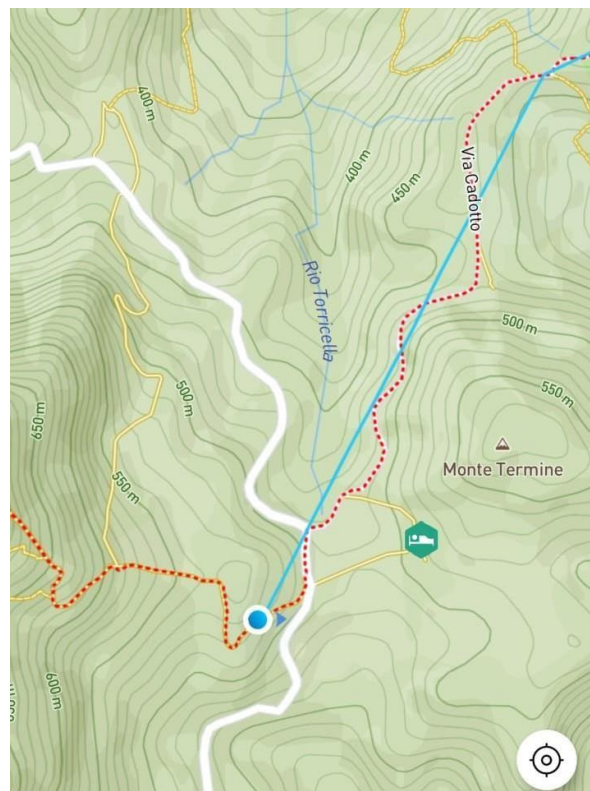

If You choose to go by train, once You arrive at Lama di Reno, follow the indications for Panico and then You'll find the directions for San Silvestro. It's a paved uncrowded road that will lead You to the original VLS path in the location of San Silvestro where there is a small church.

After Monte Santa Barbara avoid taking the path number 100 A which is closed due to landslides and barred by branches, (see photo) but take the path 100 that climbs to the summit of Monte Sole and then descend to Caprara di Sotto and Poggiolo.

After Monte Termine starts the climb to Monte Salvaro. There was a landslide at the point indicated in the map below, but thanks to the intervention of Ente Parchi and Bonifica Renana the path is now accessible. Just pay attention, though.

Immediately after the junction with path 061 in the area of Monte Pezza there is a large landslide (see blue point on the map below). Also here, thanks to the intervention carried out, the path is accessible. Always pay attention especially in case of rain that will make that spot muddy again. In case of difficulty, you can take the path 061 and go down to Veggio and Ca' di Benassi (a challenging descent) and from there easily reach Grizzana Morandi by the road.

At the moment there are no other particular difficulties to report. Al momento non ci segnalano altre particolari difficoltà. We recommend extreme caution and attention. Enjoy your journey!
